E.A.P. Lakshan Edirisinghe

Junior Mobile Application Developer (Flutter | Android)

Sri Lanka | +94 76 616 6549 | lakshanedirisingheedu2022@gmail.com

LinkedIn | GitHub | LeetCode | HackerRank

PROFESSIONAL SUMMARY

Software Engineering undergraduate at the Open University of Sri Lanka focused on mobile application development. Built a native Android application in Java with sensor integration, Google Maps and gamification features, and currently developing a Flutter and Supabase app and a multiplayer chess game in Godot. Strong foundation in data structures, algorithms and version control, with a growing interest in cyber security. Seeking a Junior Flutter or Android Developer role to build reliable, user-friendly mobile products in a collaborative team.

TECHNICAL SKILLS

Mobile: Android (Java, Kotlin), Flutter (actively developing), Android Sensors, Google Maps

Languages: Java, Kotlin, Python, JavaScript, TypeScript, GDScript, PHP

Backend and Databases: Firebase (Authentication), Supabase (Database, Authentication), MySQL

Web: HTML5, CSS3, React, Vue.js, Bootstrap, Tailwind CSS

Tools: Git, GitHub, Godot Engine, Postman, Figma, Linux

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, Version Control Workflows, Cyber Security fundamentals

PROJECTS

ProCutNation – Android Application | Java | GitHub

University project: a native Android app that helps students beat procrastination by combining task management with a Pomodoro focus timer.

- **Focus mode:** the timer stops when a notification arrives or when the phone is picked up
- **Light sensor:** warns the student to move to a brighter place when the surrounding light is too low
- **Gamification:** XP, levels and points for completed tasks, a leaderboard, and a store to buy virtual dino pets
- **Study spots:** Google Maps integration showing nearby parks, libraries and other places to study
- **Study analytics:** today's focus time, weekly focus hours and a subject-wise breakdown

Pitch Finder – Mobile Application | Flutter | Supabase | Under development

A cross-platform mobile app built with Flutter, using Supabase for both data and authentication.

Chess Night – Collaborative Chess Game | Godot Engine | GDScript | Under development

A collaborative chess game built with the Godot Engine and GDScript, featuring real-time multiplayer.

EDUCATION

Bachelor of Software Engineering (Computer Software Engineering)

Open University of Sri Lanka | Oct 2022 – Aug 2028 (expected)

ACHIEVEMENTS AND COMMUNITY

- GitHub achievements: Pull Shark (x2), Quickdraw
- Active contributor to open-source and collaborative projects
- YouTube content creator
- Practising problem solving on LeetCode and HackerRank
